

Pure Marine Fuels™

Lower costs, reduce risks and
simplify bunker procurement
for your business

Securing the right bunker fuel in the right ports might make all the difference for operating your business seamlessly and protecting your margins. However, energy procurement is increasingly complex, uncertain and volatile across the maritime supply chain due to regulatory changes and decarbonization requirements.

Today, we can help you with a solution to bunker fuel procurement that gives you enhanced access to competitive pricing, optimized bunker logistics and improved claims support. We can navigate the energy transition together, providing you with our expertise in renewable biofuels, shipping ecosystems and the future of maritime fuels.

What is Pure Marine Fuels™?

We are a strategic partnership between Cargill and Maersk Tankers, offering marine fuel procurement as a service to tramp shipping companies and trading houses. With Pure Marine Fuels™, operational excellence meets deep trading and risk management expertise.

We use our scale and market presence to help you with immediate concerns like logistics, optimizing margins and claims management. We also help you keep an eye on long-term considerations like regulatory changes, vessel efficiency and the global energy transition.

Every year,
Cargill and
Maersk
Tankers:

Purchase
4.1 million
bunkers

Handle
9,500
stem liftings

Transport
300 million
metric tons of cargo
